

READYSHOT

ReadyShot™ is a laser based handgun training system. It works with our smart target, computer software, and your personal handgun. ReadyShot™ enables you as a gun owner to affordably practice where it counts, in your own home, with your own gun, using your own realistic tactical simulations.

ARE YOU READY?

ReadyShot™ enables you as a gun owner to affordably practice where it counts, in your own home, with your own gun, using your own realistic tactical simulations.

Owning a handgun is the first step to personal security. Now, you must learn how to access and use your handgun with confidence. Building that important level of competence and confidence requires practice, practice, and more practice. Repetitive practice builds muscle memory, which experts say is the best way to prepare for a highly stressful situation – such as defending yourself or your family with your handgun.

ReadyShot helps you become comfortable, proficient, competent, and ready.

Why Use ReadyShot?

ReadyShot enables realistic simulations of tactical scenarios in nearly any location where you may need to use your handgun.

- Save money, no ammunition required
- Affordably augment your live-fire practice
- Practice with your gun in your home
- Build muscle memory and confidence
- Safe, simple, convenient, and easy-to-use

BE READY!

How It Works

ReadyShot works with your own handgun, allowing you to practice in your own home safely. Using ReadyShot is simple and affordable – no gun range fees or ammunition needed. ReadyShot comes with a smart target, computer software, and specific inserts for your handgun's barrel, trigger, and magazine. Simply turn on the target and start shooting.

One of the many features of ReadyShot is a unique "Timed Random Delay" (TRD) mode, which is used as follows:

- Unload your handgun and add ReadyShot inserts
- Select TRD mode on the ReadyShot target
- Go back to what you were doing
- When the system randomly beeps, retrieve your handgun
- Bring your handgun on target
- Pull the trigger
- Evaluate your accuracy and speed

Use ReadyShot alone or connected to your computer. Either way, ReadyShot provides several different opportunities for improving your skills. Tic-tac-toe and Duel modes offer those with a competitive streak to have some fun too!

**Use ReadyShot.
Gain Confidence.
Get Proficient.
Be Ready.**
