When the bad guy breaks into your home, chances are this isn't his first break-in. Are you ready to defend your home and family? Really? Get READY with ReadyShot™!

Owning a handgun is only a first step to personal security. Now, you must learn how to master your firearm. Achieving that key level of skill, speed, and confidence requires repetitive practice. Repetitive practice builds muscle memory, which experts say is the best way to prepare for highly stressful situations. Designed with civilians and law enforcement in mind, the ReadyShot system helps you safely and quickly master your firearm by allowing practice:

- with your own gun
- in the privacy of your own home
- using your own tactical scenarios
- without expensive ammo or range fees
- at your convenience

How It Works

The ReadyShot Target provides instant feedback during training, rapidly helping you improve your skill. Properly align your sights and squeeze the trigger. Your ReadyShot-equipped handgun instantly fires a laser pulse. The ReadyShot Target senses the laser "hit" from your gun and provides instant feedback on speed and accuracy. You practice, learn, and improve.

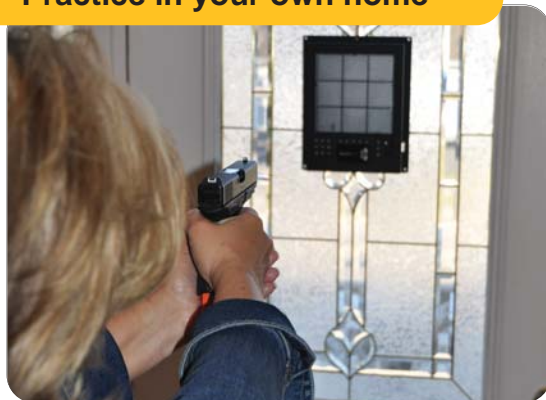

Variety Keeps it Fun

You can easily change the ReadyShot Target settings to provide numerous scenarios for your customized, effective practice.

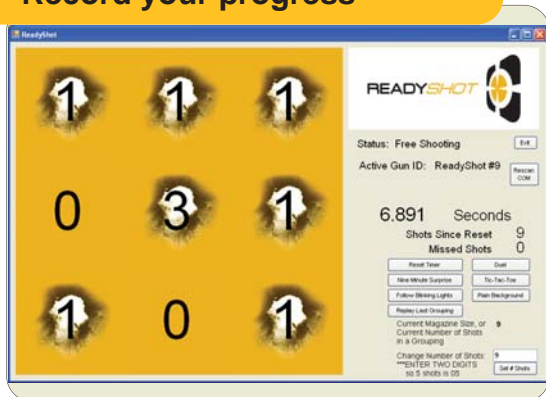

Use your own gun

Practice in your own home

Record your progress

How to use ReadyShot:

In less than 45 seconds, you can:

- Set the ReadyShot Target on a bookshelf or hang it on a door and turn it on.
- Insert your ReadyShot Gun Kit, a barrel laser insert and weighted magazine, into your empty handgun.
- Start shooting and receive interactive immediate feedback.
- Use the ReadyShot Target stand-alone or connected to a computer and/or your home audio system for enhanced realism and feedback.
- Disassemble your ReadyShot Gun Kit in less than 15 seconds when finished; no permanent modifications to your gun.

Improve your skill with your ReadyShot-equipped handgun

- Practice response shooting by drawing from your holster, safe, or drawer
- Practice timed shooting
- Duel with a partner
- Respond to a surprise, simulated break-in
- Have fun playing Tic-Tac-Toe or Target Light Pursuit games

At any time, replay your last set of shots for instant analysis, using a simple button selection.

**Use ReadyShot.
Gain Mastery and Confidence.
Build Muscle Memory.
